

Compugen Wins Award for Highest Citrix Business Growth in Canada in 2005

Richmond Hill, Ont. – Feb. 15, 2006 – Compugen Inc., a Citrix® Solution Advisor and one of the largest Canadian-owned IT solution and service providers and PC systems integrators, is pleased to announce that it has been recognized by Citrix Systems, Inc. for achieving the greatest growth in Citrix product sales in Canada for 2005.

The award was announced at Citrix Summit 06, held at the end of January in Orlando, where Citrix partners from around the world gathered to learn about Citrix investments in its expanding product portfolio and to share new ways to grow their businesses. Awards were presented in a number of categories, and Compugen was recognized for reaching 183 percent growth in Citrix product sales over the previous year, surpassing that of more than 140 other Citrix partners operating in Canada.

“We are pleased to recognize the Compugen team for their efforts,” says David Wright, Area Vice President, Canada, Citrix Systems, Inc. “As a Citrix Solution Advisor, Compugen has demonstrated a strong commitment to working with Citrix for the benefit of customers across Canada who need a robust access infrastructure that helps them meet a variety of business challenges, including cost reduction and regulatory compliance.”

When asked about what was driving the growth in Compugen’s Citrix business, Lou Tetsos, Citrix consultant in Compugen’s Enterprise Solutions practice, explained that “Virtually every IT decision maker is looking at a core, common set of goals these days, especially virtualization and consolidation, and Citrix plays strongly into both those initiatives.”

It appears that many customers are now adopting a more holistic approach to Citrix, using it to drive the desktops for 100 percent of their users, whether they are in head office, in branch offices or out on the road. As evidence of this trend, Compugen has seen the size of many of its Citrix projects grow substantially, from one to two servers and 20 to 50 users, to multiple servers supporting hundreds of users at a time.

To support this level of growth in Citrix-based business, and to continue providing customers with expertise across Citrix’s expanding product portfolio, Compugen has grown its national Citrix practice to include more than 20 certified SEs operating across the country, with its Richmond Hill location achieving Solution Advisor Platinum status.

Responding to the award from Citrix, Harry Zarek, Compugen’s President and CEO, remarks that, “Compugen is delighted to have been recognized for our significant investment in the Citrix platform. This was a strategic investment that Compugen made as part of our focus on Total Cost of Ownership as a foundation practice for our business.”

In describing the significance of Citrix to Compugen’s overall business, Zarek goes on to add that, “Citrix technology offers a strong management environment that scales well in a number of key vertical markets. The Citrix technology allows us to complement our vendor relationships with Cisco®, Hewlett-Packard®, IBM® and Lenovo® with each providing key technology components to our overall solution on a Microsoft® platform. We have developed industry-leading capabilities in managing the integration of these products into a seamless computing environment.”

About Citrix Solution Advisors

At the core of the Citrix Access Partner program are approximately 4,400 Citrix Solution Advisors that deliver innovative and strategic enterprise access solutions for end customers worldwide. They provide a spectrum of services that range from acting as a trusted advisor on planning access strategies, to helping customers acquire, build and support access solutions. The Citrix Solution Advisor program includes value-added distributors and resellers, system integrators, application solution advisors and government advisors.
