

Azure Cost Optimization

SERVICE DESCRIPTION

Compugen's *Azure Cost Optimization* assessment helps you maximize the value of your cloud spend.

Organizations have identified high costs as one of their cloud concerns and rightfully so. [Flexera's 2021 State of the Cloud Report](#) indicates that 61% of organizations are planning to optimize their existing cloud use – the top initiative this year. Why? To mitigate approximately 30 – 39% cloud overspend.

Struggling to understand how much you're spending or how much you should be spending? In an Azure world it can be difficult and frustrating to identify where and how to realize savings. Compugen can help.

Optimizing your cloud spend

Determine where and how to get the most out of your Azure cloud along with projected potential monthly savings. Our skilled Azure specialists will help ensure you don't spend more than you need to.

Your assessment reviews seven key areas to ensure that consumption, spend, licencing and budgets are properly aligned. Technical elements utilize zero-disruption tools so they can perform without disturbance to your environment.

We'll review all portions of the assessment with you during the post-analysis workshop phase.

Upon assessment completion you will receive a high-level analysis report identifying options for potential cost reductions. Our team of Azure Experts will then work with you to review and understand the analysis and propose a detailed implementation plan to help realize those savings. In as quickly as four to six months, many customers realize cloud spend savings by as much as 50%.

Right Size Resources

Ensuring your cloud resources only consume what they need to.

Terminate Zombie Assets

Eliminating unused infrastructure so you're not paying for something you don't need or use.

Scheduled Downtime

Turning off unused resources when they're not needed.

Reserve Resources

Reserving resources for infrastructure that is always on or frequently used.

Configuration Optimization

Enhancing data tier, geo-redundancy and type of disk configurations.

Licence Optimization

Evaluating licencing options that can dramatically reduce costs.

Resource Tagging and Budgets

Tagging resources by business area to better associate and align budgets by business need, providing better cost control and informed decision making.

Azure Cost Optimization

SERVICE DESCRIPTION

Approach

What we do

- Assess and analyze your current Azure environment using Compugen tools

What you get

- High level savings projections

What we need

- Partner Admin Link (PAL) enabled Contributor access to your Tenant

Pricing

How the pricing works	There's no charge to you for Compugen to conduct a cost optimization assessment and present our findings. We will include projected savings and our recommendations for how to realize them, along with estimated costs for implementing those recommendations. It's your choice whether to make those changes yourself or engage us to do them for you.
Service Code	PSV-0849
Out of Scope	Implementation of the recommendations included in the report. Remediation of any pre-existing issues.
