

Azure Migration Assessment

SERVICE DESCRIPTION

Clarify the Confusion

An effective first step in your Cloud Adoption path as you move your on-premise environment to Microsoft Azure.

Aligned with the Microsoft Azure Cloud Adoption Framework (CAF), this preparatory assessment is an excellent option for organisations beginning their Azure journey, or those looking for confirmation of their work to date.

Choose the plan from the table below that best aligns with your requirements.

Analysis and recommendation on the following in Azure	Basic	Premier*
Identify candidate workloads for migration	•	•
Summary of migration readiness with guidance	•	•
License optimization recommendations	•	•
Resource allocation guidance	•	•
Estimate of monthly Azure cost	•	•
Presentation of findings and recommendations	Summarized	Detailed
Total cost of ownership (TCO) of on-premise environment versus Azure		•
Network readiness checklist		•

* Included in the Azure Workload Migration Bundle. Please see that Service Description for further details

Benefits

- Improve Azure migration timeline and predictability
- Identify “low risk / high value” workloads to migrate to Azure
- Illustrate reduction in infrastructure TCO
- Determine areas to improve virtual infrastructure elasticity and agility

Azure Migration Assessment

SERVICE DESCRIPTION

Approach

What we do

- Discovery
- Analysis
- Presentation of recommendations and findings

What you get

- Strong candidate workloads for migration identified
- Summary of migration readiness with guidance
- License optimization recommendations
- Azure resource allocation guidance
- Monthly Azure cost estimates
- Presentation of findings and recommendations
- Total cost of ownership (TCO) of on-premise environment versus Azure (Premier only)
- Network readiness checklist (Premier only)

What we need

- Customer engagement for project duration.

Pricing

	Basic	Premier
Fixed Fee	\$1,000	\$2,500
Invoice type	One-time	One-time
Service Code	PSV-0852	PSV-0853
Constraints	Assessment phase limited to VMware (vCenter 5.5 or higher) VMs, Hyper-V (Server 2012R2 or higher) VMs, and physical servers running 64-bit Microsoft Windows operating systems. Ability to deploy the Microsoft Monitoring Agent (MMA) to all VMs and physical servers as required.	
Out of Scope	Remediation of any issues identified during discovery Operational documentation.
