

Azure Workload Migration Bundle

SERVICE DESCRIPTION

Begin the Journey

Closely aligned with the Microsoft Azure Cloud Adoption Framework, Compugen's most comprehensive Azure Migration service offering includes each of the elements necessary to help you move from assessment through to migration of a sample of targeted workloads.

This service includes all of the deliverables in each of our Migration Assessment and Foundation Design & Build offerings, in addition to comprehensive planning and migration of 10-15 targeted Windows workloads to the Azure Landing Zone.

Working closely with your team we will provide the following services:

- Assessment and Reporting of your on-premises infrastructure to aid in targeting, right sizing, and prioritizing candidate workloads and applications for their transition to the cloud
- A flexible Foundational Azure Reference Infrastructure deployment tailored to suit current and future workload migrations
- Migration, testing, and optimization of the selected workloads into the newly created cloud foundation

This plan covers the following activities:

- All Premier level activities as outlined in the Azure Migration Assessment
- All Premier level activities as outlined in the Azure Foundation Design & Build
- Implementation of the Azure Migration Toolset into your on-premises infrastructure
- Migration of up to fifteen (15) Windows virtual and/or physical machines into the new Azure Foundation
- Up to four (4) hours of operational guidance for your Cloud Administration Team with focus on Azure Management, Monitoring, and Administration
- The creation and delivery of as-built documentation

Azure Workload Migration Bundle

SERVICE DESCRIPTION

- Benefits**
- Identification of the workloads best suited for cloud migration
 - Optimization of the selected workloads to ensure optimal cloud spend
 - Creation of a solid cloud foundation on which to support
 - Interactive experience leaving you with the confidence to continue on your own

Approach The following activities are completed under this assignment:

1. Inventory of your server infrastructure including collection of workload utilization metrics
2. Analysis of the collected data for workload categorization, Azure VM sizing, preliminary modernization opportunities, and cost modeling
3. Presentation of recommendations and findings
4. Azure subscription and Foundational infrastructure setup
5. Migration of selected Infrastructure as a Services (IaaS) workloads into Foundation

Pricing

	Basic
Fixed Fee	\$35,000.00
Invoice type	One-time
Service Code	
Constraints	Assessment phase limited to VMware (vCenter 5.5 or higher) VMs, Hyper-V (Server 2012R2 or higher) VMs, and physical servers running 64-bit Microsoft Windows operating systems.
Out of Scope	Remediation of any pre-existing issues. Data Circuit provisioning, changes, bandwidth remediation, and/or optimization. Operational documentation.
